

IT ASSOCIATION

"The technology you use impresses no one; the experience you create with it is everything." –Sean Gerety

Information Technology has become the backbone of modern civilisation, enabling mankind to accomplish feats that once seemed beyond imagination. At St. Joseph's College, the IT Association plays a pivotal role in supporting major school events by combining technical expertise with creativity and innovation.

Under the able guidance of our Chairperson, Mr. Chandan Kumar Mishra, and the dedicated Computer Science faculty—Mr. Wayne K. Gardner, Mrs. Anamika Fredrick, Mrs. Shabana Y. James, Mr. Jude Augustine Joy Peter, and Mr. Martin Linus—the Association made significant contributions to two of the College's flagship events: Teachers' Day and JOSEPHEST 2025.

Our first major assignment of the year was the Teachers' Day Celebration, for which we produced a documentary highlighting the invaluable role of teachers in shaping our lives, along with a special video conveying our heartfelt gratitude and best wishes to the teaching fraternity.

The Association's most challenging yet rewarding undertaking was JOSEPHEST 2025. With dedication, teamwork, and meticulous planning, our members successfully managed the digital and multimedia presentations for the festival. We produced the theme reveal, the "Life at SJC"

presentation, promotional trailers for both days of the festival, and several other multimedia features that enhanced the overall experience for participants and spectators alike. The valuable contributions of Mrinank Tiwari, Abhishek Sharma, Prashant, Mohammad Ismail, and Martand Vikram played an instrumental role in the successful execution of these assignments.

The achievements of the IT Association were the result of the collective efforts of every member. I extend my sincere appreciation to my fellow office bearers—Arindam Yadav (Vice President), Pramit Pandey (General Secretary), Saumy Singh (Organising Secretary), and Shashank Shekhar Pandey (Treasurer)—whose coordination, dedication, and teamwork ensured the smooth execution of every project undertaken during the year.

As we conclude another successful session, we remain committed to using technology creatively and responsibly in support of the College's activities. The IT Association will continue to strive for excellence, enriching every event through innovation, professionalism, and a shared passion for creative expression.

Utkarsh Chandra Misra
President
